## FILE CLEARANCE EDITS - 1500 THROUGH 1999

---

### Overview

Messages 1500-1517 are generated when there is an error condition that takes place in the batch process at the time the batch file is run.

These error conditions cannot be corrected by a worker and must be referred to the county data processing section. The edits involved are found in file clearance in the same numerical order as the messages.

---

- 1501**      **COUNTY-ID/MEDS-ID CONFLICT**      ***URGENT***  
The County-ID in the transaction matches a County-ID on file, but the MEDS-ID on the transaction does not match the MEDS-ID on file for the transaction County-ID.
- ACTION:** Request a MEDS inquiry by both the County-ID and the MEDS-ID on the transaction. Determine the correct numbers, correct and resubmit the transaction.
- 1502**      **COUNTY-ID/BIRTHDATE CONFLICT**      ***REJECT***  
The County-ID on the transaction matches a County-ID on MEDS but the Birthdate on the transaction does not match the Birthdate on MEDS.
- ACTION:** Request a MEDS inquiry and compare the transaction information against the MEDS information. Correct the County-ID and/or the Birthdate and resubmit the transaction.
- 1503**      **CLIENT-INDEX-NUMBER/MEDS-ID CONFLICT**      ***URGENT***  
**ACTION:**

---

**1504      CLIENT-INDEX-NUMBER/MEDS-ID VS COUNTY-ID/MEDS-ID      *URGENT*  
CONFLICT**

This alert message is issued when both a County-ID and Client Index Number are reported on a transaction. The MEDS file clearance edits check to see if the County-ID and CIN are known to MEDS. If they are, then they both must be associated with the same MEDS-ID. If the MEDS-ID associated with the County-ID is different from the MEDS-ID associated with the CIN, then the transaction is rejected and alert 504 is issued.

**ACTION:**

Workers should research the two different MEDS-IDs displayed on the alert. If both MEDS records are for the same person, then the county welfare department must combine the two records using the EW11 transaction before doing any subsequent updating. If the two MEDS records are for different people, then the worker should research the case and verify that the correct county-id and CIN for that individual are reported on the transaction.

**1505      PSEUDO MEDS-ID MUST BE KNOWN TO MEDS      *URGENT***

The MEDS-ID submitted on the transaction is a pseudo number but does not match a MEDS-ID on file.

**ACTION:****1506      UPDATE TRANSACTION - CLIENT NOT KNOWN TO MEDS      *\*URGENT\****

The transaction indicates a change to an existing MEDS record and no MEDS record was found using the CIN, MEDS-ID and/or County-ID reported on the transaction.

**ACTION:** Determine whether there is missing information or an error in the CIN, MEDS-ID and/or County-ID reported on the transaction or whether there is no MEDS record due to a fatal error on a previous transaction that would have built the MEDS record. Submit updates as needed to correct MEDS.

---

---

**1507      NO MATCHING COUNTY-IDS FOUND FOR CASE UPDATE TRANSACTION      *REJECT***

No matching County-IDs were found for a case update transaction.

**ACTION:** Determine whether there is missing information or an error in the County-ID fields reported on the transaction or whether there is no MEDS record due to a fatal error on a previous transaction that would have built the MEDS record. Submit updates as needed to correct MEDS.

**1508      SCI CIN/MEDS-ID CONFLICT - MEDS-ID CHANGE REQUIRED      *URGENT***

**ACTION:**

**1509      TWO MEDS RECORDS HAVE SAME CIN; CHAINING REQUIRED      *URGENT***

**USE EW11**

**ACTION:**

**1510      TRANSACTION FAILED MEDS NAME/BIRTHDATE MATCH CRITERIA –      *URGENT***

The transaction header birthdate did not match MEDS and, if a new birthdate was reported, it also did not match MEDS. An attempt to process the transaction based on MEDS reasonable birthdate/name match edits failed. See File Clearance Edits for details on MEDS birthdate match criteria. Since there is some question as to whether the person identified on the transaction is the same person known to MEDS, this transaction did not update MEDS.

**ACTION:** Review county records to determine whether the client identification information reported on the transaction is correct. Review MEDS information to determine whether the CIN, MEDS-ID and/or County-ID reported on the transaction is associated with a different person on MEDS. If the records are for two different persons, determine whether a MEDS-ID change is needed, whether a new County-ID will need to be assigned and/or whether there is a CIN conflict that will need to be resolved.

**1511      NEGATIVE ACTION UPDATED MEDS - FAILED DOB/NAME EDITS –      \*ACTION**

The transaction header birthdate did not match MEDS and, if a new birthdate was reported, it also did not match MEDS. An attempt to process the transaction based on MEDS reasonable birthdate/name match edits failed. See File Clearance Edits for details on MEDS birthdate match criteria. Since the transaction was a negative action and the County-ID matched MEDS, this transaction updated MEDS.

**ACTION:** Review county records to determine whether the client identification information reported on the transaction is correct. Determine whether a name or birthdate change is needed and submit updates as needed to correct MEDS.

**1512      BIRTHDATE DISCREPANCY IDENTIFIED – CHECK FOR DOB CHANGE –      \*ACTION**

The transaction header birthdate did not match MEDS and, if a new birthdate was reported, it also did not match MEDS. An attempt to process the transaction based on MEDS reasonable birthdate/name match edits resulted in a reasonable match. See File Clearance Edits for details on MEDS birthdate match criteria. Since there is reason to believe that the person identified on the transaction is the person known to MEDS, this transaction will have updated MEDS unless there is a fatal message for this transaction. However, the birthdate on MEDS will not have been changed.

**ACTION:** Review county records to determine whether the birthdate reported on the transaction is correct and submit updates as needed to correct MEDS.

**1513      HIC-NO BELONGS TO ANOTHER MEDS-ID      URGENT**

**ACTION:**

**1611      EFFECTIVE DATE MORE THAN 1 MONTH IN FUTURE      \*ACTION**
